- Proficient in: C#, .NET Framework, JavaScript, ASP.NET, ASP.NET MVC, Web MVVM, HTML5, CSS, Knockout, Bootstrap, jQuery
- Familiar with: Lotus Domino Web/Desktop, WinForms, VB6, Perl, D3.js

### Software

- Database: Microsoft SQL Server, MySQL and forks
  - Platforms: Linux/UNIX, Windows (all versions)
- 

## EXPERIENCE

---

### Lead Software Consultant

8/2015 – present

*VIA Oncology (Pittsburgh, PA) – Contract through OpenArc, LLC.*

- Lead web developer for a project to rewrite a poorly written application in order to increase extensibility, maintainability, and to adhere to modern standards.
- .NET/C# MVC/JavaScript/jQuery/CSS web development with Entity Framework.
- Developed training classes for developers new to unit testing with MS Test and Moq.
- Conversion of poor performing stored procedures to Entity Framework.
- Created coding and design standards.

### Manager, Solution Development

5/2013 – 8/2015

*Guardian Protection Services (Warrendale, PA)*

- Management and mentorship of 5 .NET developers and 2 ERP administrators.
- SQL Server database administration and performance tuning.
- .NET and MVC/Knockout/jQuery/CSS web development.
- Management and growth of an SOA application architecture that sits on top of a third party ERP system (MAS Business & MAS Monitoring).
- Architect for new applications.

### Software Engineer

5/2008 – 5/2013

*Confluence Technologies, Inc. (Pittsburgh, PA)*

- Supported legacy VB6 and C# 2.0 WinForms applications.
- Currently developing multiple single page web applications using MVC3, C#, Azure Block Storage, Twitter Bootstrap, require.js, underscore.js, Knockout.js, and jQuery.
- Extensive use of JavaScript in developing a responsive client application using MVVM patterns.

- Supported a move to the MSF for CMMI SDLC from Waterfall. Helped support the introduction of Agile approaches to software development (modified SCRUM).

**Senior .NET Software Engineer**

9/2007 – 5/2008

*Lucas Systems, Inc. (Wexford, PA)*

- C# 2.0 programmer for company that delivers voice-directed warehouse management solutions.
- Development of an API for warehouse management solutions.
- Development of Windows services, web services, and reusable software.

**Senior .NET Developer / Team Lead**

7/2006 – 9/2007

*TrueBaseline Corp. (Pittsburgh, PA)*

- C# developer for large-scale SOA systems.
- Wrote several Windows services and web services to support enterprise software targeted at telecoms.
- Created code review cycle guidelines for developers and implemented SDLC initiatives.
- Helped port C# web and Windows services to mono running on Linux, including recoding portions of mono's OracleClient to enable Oracle 10g's XML data type support.
- Programmatic XML creation and parsing.
- Writing abstract, reusable components for use in enterprise software.
- Management of small groups of developers using Agile (SCRUM) methods.

**Web Developer, Webmaster, Windows/Linux Systems Administrator**

9/1999 – 7/2006

*SAIC/ProcureNet (Pittsburgh, PA; Great River, NY; Fairfield, NJ)*

- Web development on a production \$300 million military procurement system (Lotus Domino).
- Led effort to migrate from HP/3000 system to ASP.NET (C#) on SQL Server.
- Wrote server monitoring and alert tool with web dashboard.
- Created HTML/CGI (Perl/HTML:Mason) template-driven intranet site.
- Administration of NT4, Windows Server 2000 and 2003, and multiple SuSE VMs on IBM POWER5 hardware.

**UNIX Systems Administrator, Web Developer**

6/1996 – 9/1999

*Penncom Internet Company (Warren, PA)*

- Created online ordering system for a national auto parts store.
- Managed technical support staff.
- UNIX/Linux system administration, including DNS & BIND, Apache HTTP Server, LDAP authentication).
- Network monitoring and troubleshooting of 30 ISP sites.
- Production support of servers serving 50,000 customers.

---

EDUCATION

**Ashford University**

July 2012

*Clinton, IA*

- BA Psychology, Magna Cum Laude
